

25.10.2011

Dear business partners,

The safety instructions of Easmar Logistics Oy have been changed during autumn 2011.

All people, who are moving within the premises of Easmar Logistics Oy should use safety helmet, clothes with reflector or at least, the vest with the reflector as well as safety shoes. The safety equipment should be used within warehouse and loading zones' areas.

Autumn, 2011 and the beginning of winter are transition periods, during which, the safety helmet as well as the vest can be borrowed from Easmar Logistics. Starting from the beginning of 2012, all the drivers should have their own safety equipment.

Easmar Logistics' s warehouse premises are customs bonded warehouse areas. All unnecessary movements within this area are strictly prohibited. It means that the driver should first check in the office, before going to the warehouse area. While moving in the loading area, it is highly recommended to follow safety regulations.

Best regards,

Jukka Komulainen

Operative director

Easmar Logistics Oy
